Skills

Operating systems	Windows 10.
Languages and technologies	Backend: Java, J2EE Frontend: Angular
Tools	GitHub, MySQL Workbench
Databases	MySQL

Work experience

Cybage Software Pvt. Ltd. | Pune | www.cybage.com

Software Engineer

December 2022 – Till date.

Project experience

1. Project name: Rajwada Event Services

Domain: Event Management System

Project description:

The Event Management System is a web-based application that allows users to book and manage various events. The system is developed using Spring Boot in the backend, Angular HTML, CSS, Bootstrap in the frontend, and MySQL as a database management system. The system has three main modules: Admin, Event Manager, and User.

1. Admin Module: The Admin module provides central access to the system. Admins can manage user accounts, event managers, and view event-related statistics. Admins can also create new event manager accounts.
2. Event Manager Module: The Event Manager module allows event managers to create, update, and delete events.
3. User Module: The User module enables registered users to browse events, view event details, and book events. Users can also raise complaints about events. Additionally, the User module provides a search functionality to search for events based on event name.

Technology Stack:

- Backend: Spring Boot
- Frontend: Angular HTML, CSS, Bootstrap
- Database: MySQL

Academic/professional credentials
